

# Joel Revuelta

Software developer

## About Me

As a student at Epitech, I possess a unique combination of technical knowledge and interpersonal skills. My ability to communicate and collaborate effectively, along with my adaptability and positive attitude, make me a valuable asset to any team. I am seeking internship opportunities to apply my skills in a real-world setting and continue to grow personally and professionally.

## Projects

[my\\_radar](#) 01/2023

Using C and CSFML I developed an air traffic control panel simulation. In this project I learned how to detect collisions between entities and manage them. Also mastered working with linked lists to control the planes and towers.

[my\\_ls](#) 11/2022

my\_ls is a recreation of the ls command in C, including many flags. This project has taught me how to work with files and directories in C.
